

Product Datasheet

Purified recombinant Green Fluorescent Protein (wild type) orb1972372

Description	Purified recombinant Green Fluorescent Protein (wild type)
Tested Applications	ELISA, WB
Form/Appearance	Each vial contains 100µg 1mg/ml purified recombinant GFP (wild type) in 10 mM TRIS buffer pH 8.0, containing 0.02% sodium azide.
Concentration	1mg/ml
Storage	Storage: The antibody may be stored at +4°C. For prolonged storage prepare appropriate aliquots and store at or below -20°C. Prior to use, an aliquot is thawed slowly in the dark at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance or the concentration of the product
Note	For research use only.
Source	Wild type recombinant GFP (from A.victoria) expressed in E.coli and purified by high resolution gel filtration.
Uniprot ID	P42212
Expiration Date	6 months from date of receipt.
