Product Datasheet

Chicken CD40L(Cluster Of Differentiation 40 Ligand) ELISA Kit orb1994853

Description Chicken CD40L(Cluster Of Differentiation 40 Ligand) ELISA Kit

Reactivity Gallus

Range 0.16-10 ng/mL

Sensitivity 0.054 ng/mL

Note For research use only.

Sample Types serum, plasma, tissue homogenates, cell lysates and other biological fluids

Expiration Date Please enquire.

Application Notes The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate

provided in this kit has been pre-coated with an antibody specific to Chicken CD40L. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Chicken CD40L. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Chicken CD40L, biotin-conjugated

antibody and enzyme-conjugated Avidin will exhibit a change in color. The

enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Chicken CD40L in the samples is then determined by comparing the OD of

the samples to the standard curve.
