Pet1 antibody {CF647} orb158138-CF647

Description	Rabbit polyclonal antibody to FEV, which is also known as Pet1 and HSRNAFEV. FEV is frequently found in the nuclear speck and is expressed in the ureteric bud of the kidney and pancreas. It is overexpressed in the basal ganglia in the brain. This protein plays an extensive role in cell growth by acting as a transcriptional growth regulator and repressor. It also functions in the differentiation and the maintenance of the central serotonergic neurons.
Reactivity	Human, Mouse, Rat
Predicted Reactivity	Equine,Bovine,Sheep,Gallus
Conjugation	CF647
Tested Applications	ICC, IF
Concentration	100 µg in 500 µl (0.20 mg/ml)
Storage	Shipped at 4°. Store at -20 °C for one year. Avoid repeated freeze/thaw cycles.
Note	For research use only.
Dilution Range	To be determined by the end user
Expiration Date	12 months from date of receipt.
